NRCS OFFICE: _____ PHONE: _____

A properly operated and maintained roof runoff management system is an asset to your farm. This roof runoff management system is designed and installed to collect and dispose runoff water from your roof. The estimated 10-year life of this installation can be assured and will be increased by developing and carrying out a good operation and maintenance program.

Here are recommendations to help you develop a good operation and maintenance program.

OPERATION RECOMMENDATIONS

- Direct downspouts away from building.
 - Provide protection against erosion at outlets.
 - Insure clean water does not flow into livestock areas or waste storage facilities.
 - Additional operation recommendations, if any:
-
-

MAINTENANCE RECOMMENDATIONS

- Clean gutters, downspouts, and outlet drainageways periodically.
 - Repair loose or missing supports.
 - Repair any leaks in gutter.
 - Additional maintenance recommendations, if any:
-
-
